**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Glen Barnes (Reg No 42,293) on March 21, 2006.

2. The application has been amended as follows:

Amend Claim 1, Lines 9-11 to read "using a logical AND to combine a plurality of memory protection bits, wherein at least one of the memory protection bits is a dirty bit, for the plurality of TLB entries to enforce memory protection the virtual machine application"

Cancel claim 2

Amend Claim 8, Lines 15-17 to read "using a logical AND to combine a plurality of memory protection bits, wherein at least one of the memory protection bits is a dirty bit, for the plurality of TLB entries to enforce memory protection on the virtual machine application"

Cancel claim 9

Amend Claim 15, Lines 11-13 to read "using a logical AND to combine a plurality of memory protection bits, wherein at least one of the memory protection bits is a read/write bit, for the plurality of TLB entries to enforce memory protection on the virtual machine application"

Cancel claim 17

## REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: The independent claims 1 and 8, as amended by examiner's amendment are drawn to a method for providing hardware support for memory protection...using a logical AND to combine a plurality of memory protection bits, wherein at least one of the memory protection bits is a dirty bit. Similarly independent claim 15 as amended requires a read/write bit to be used in a logical AND operation to enforce memory protection on the virtual machine application.

Examiner was unable to find prior art anticipating the independent claims, further no references when combined obviated or gave sufficient motivation for using a dirty bit or read/write bit in a logical AND operation to enforce memory protection on the virtual machine application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
